

Risk Readiness Quick Guide

2027 OSHA FOCUS AREAS

Key Message

Employers should prepare for key OSHA compliance dates in 2027, including recordkeeping, electronic reporting, hazard communication and requirements affecting warehouse and storage operations.

Key Takeaways

- Covered employers must post their OSHA Form 300A summary from February 1 through April 30, 2027.
- Electronic injury and illness data must be submitted through OSHA's Injury Tracking Application by March 2, 2027, for covered establishments.
- Manufacturers, importers and distributors must update safety data sheets and labels for chemical mixtures by November 19, 2027.
- OSHA's final Emergency Response Standard is targeted for release in April 2027.
- OSHA's Warehouse Safety Initiative continues through August 2027.

ACTION ITEMS

- Confirm whether your establishment is required to submit injury and illness data electronically.
- Post the OSHA Form 300A summary by the required deadline.
- Prepare required electronic records for submission through OSHA's Injury Tracking Application.
- Review safety data sheets and labels for chemical mixtures.
- Monitor OSHA updates affecting emergency response and warehouse operations.
