

Risk Readiness Quick Guide

DRIVER SAFETY ESSENTIALS

Key Message

Organizations can significantly improve fleet safety using low-cost, practical strategies that reinforce awareness, reduce accidents and strengthen driver decision-making.

Key Takeaways

- Planned parking can help reduce backing-related incidents.
- Mirror adjustment stations can improve visibility and reduce sideswipe accidents.
- Commentary driving increases situational awareness and hazard recognition.
- These programs complement telematics and MVR monitoring efforts.
- Consistent driver engagement can improve long-term fleet performance.

ACTION ITEMS

- Implement a planned parking policy.
- Develop a mirror adjustment training process.
- Introduce commentary driving exercises.
- Observe driving behaviors during ride-alongs.
- Integrate these techniques into driver onboarding and refresher training.
