

Risk Readiness Quick Guide

GHS REVISION 7 COMPLIANCE

Key Message

Organizations should prepare now for OSHA's revised Hazard Communication Standard and Globally Harmonized System (GHS) Revision 7 requirements to maintain compliance and ensure employees understand chemical hazards.

Key Takeaways

- OSHA has established phased compliance deadlines for substances and mixtures.
- Employers must update workplace labeling, written programs and employee training.
- Manufacturers and distributors face separate SDS and labeling obligations.
- Organizations should monitor both federal and state OSHA requirements.
- Labeling, aerosols and hazardous communication updates are significant compliance considerations.

ACTION ITEMS

- Identify high-risk jobs for review.
- Review current Hazard Communication Program documentation.
- Verify SDS and labeling processes.
- Identify training gaps for affected employees.
- Develop a compliance timeline aligned with OSHA deadlines.
- Monitor federal and state regulatory updates.
